Executive Summary

Senior Software Engineer with 7 years of industry experience and advanced ML expertise from Master's education at University of Washington. Skilled in cloud architecture, AI/ ML and Full-Stack software implementation with proven success delivering high-performance solutions for global organizations, combining technical expertise with product vision to align engineering excellence with strategic objectives.

Education

University Of Washington

Seattle, WA

Masters of Science in Information Systems

Jun 2024-Jun 2025

- **Selected Coursework:** Data Mining, Artificial Intelligence and Machine Learning Applications, Advanced Databases and Data Warehousing.

Osmania University

Hyderabad, India

Bachelors of Engineering in Electrical, Electronics Engineering

Sep 2013-May 2017

Experience

Deloitte

Bengaluru, India

Senior Consultant

Jan 2023 - Jun 2024

- Architected a real-time EV data processing pipeline using Azure microservices for Shell Corp., achieving near-instant data availability, cutting compute costs by over 90%, and enhancing system reliability over previous batch systems.
- Optimized multi-database architecture (PostgreSQL, Azure Table Storage, SQL Server), reducing storage costs by 30%.
- Architected scalable Power BI report automation systems, enhancing performance and optimizing costs.
- Developed a two-stage demand forecasting model with LSTM and XGBoost, integrating personalized pricing (K-Means, price elasticity) to predict a 12% potential revenue increase.

Concentrix Catalyst

Hyderabad, India

Senior Consultant

Dec 2020 - Dec 2022

- Enhanced OnSolve's AI risk intelligence platform, enabling 100% YoY data source growth, processing 3M+ additional data points, and detecting 300K+ more events per month for real-time threat assessment.
- Engineered high-performance APIs reducing response times by 40%, enabling scalability for millions of daily alerts.
- Developed Automated Email response system leveraging NLP, ML and AWS technologies, slashing customer turnaround time by 90% and significantly enhancing operational efficiency.
- Led development of 4 core features for MCI's enterprise resource management app used by Fortune 500 organizations.
- Developed full-stack features with custom Elasticsearch clusters, enhancing search performance and speed by 40%.

Infosys

Hyderabad, India

Senior Systems Engineer

Jun 2017 - Dec 2020

- Engineered high-performance APIs reducing query execution time by 30% across SQL and NOSQL databases.
- Created AKKA.NET performance benchmarking POC adopted company-wide for validation testing of REST APIs.
- Implemented pagination strategies for transaction history handling millions of records, reducing response time by 65%.
- Modernized critical financial apps from mainframe to scalable cloud services, enhancing efficiency and maintainability.
- Implemented BDD/TDD ensuring 90%+ code coverage and zero vulnerabilities using SonarQube and Veracode.

Personal Projects

FaceEx: A Computer Vision-Based Game

- Leveraged MediaPipe for facial landmark detection and Next.js for frontend, enabling real-time facial movement tracking.

iCARE - AI-based Vision Testing Platform

- Led development as product manager, developer and UI designer, enabling online/offline operations and multilinguality.

Technical Skills

Languages: C#, Python, JavaScript/TypeScript, SQL, Java, C++

TDeveloper Tools: Azure DevOps, Atlassian tools, Git, Docker, Kubernetes, SonarQube, Terraform, Ansible

Technologies/Frameworks: NET Core, FastAPI, React, Angular, NextJS, TensorFlow, PyTorch, scikit-learn, NLP, Computer Vision, Microservices, REST APIs, GraphQL, Elasticsearch, Kafka, RabbitMQ, Azure (ML, Functions, APIM, Service Bus, Kubernetes, Redis, Cosmos DB, Cognitive Services, Event Hubs) — AWS (Lambda, API Gateway, SQS, SNS, DynamoDB, ElastiCache, EKS, ECS, SageMaker, Kinesis, Glue, IAM)

GenAI: ChatGPT, claude, claude code, Perplexity, Vercel, bolt.new, lovable.dev, napkin

Certifications: Azure Dev Associate, Azure AI/ ML Fundamentals, Generative AI for Business Leaders.
